#### Relevant Building Code clauses:

•

•

## Statement on how the building product is expected to contribute to compliance:

• options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)

• standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured

• physical properties of the building product

• how the building product is intended to be used.

Limitations on the use of the building product:

•

Design requirements that would support the appropriate use of the building product:

• Rondo recommends that you seek professional advice relating to your unique architectural and building requirements, and that of the building code, to ensure the design is compliant.

• If a compliant design is required for your project, we recommend that you contact Rondo NZ to obtain a design that is specifically customised to your project requirements. This service is complementary.

Installation requirements (also provide link to the product installation guide):

• Rondo recommends that this System is installed by a qualified trades person and according to the relevant codes and standards.

Maintenance requirements (also provide link to the product maintenance guide):

٠	There are no specific or periodical maintenance requirements when installed in accordance with the design and
	installation requirements listed above.

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?:

If yes, description of the warning or ban under section 26:

N/A
