

PRODUCT DATA SHEET

**RONDO®**

# TOP HATS AND STEEL ANGLES

Rondo Top Hats can be used internally or externally and on vertical fascias and soffits. They are often used where there is a higher wind loading or where heavy duty sheeting is to be installed.

Steel Angles can be used to strengthen internal corners of façade systems and steel framing requirements for facade systems.

**G2 Z275 & Z450 GALVANISED STEEL / VERSATILE / 0.75 AND 1.15 BMT**

#### **BENEFITS**

- Wide variety of Top Hat profiles to suit most external and internal applications and can be installed either vertically or horizontally
- Top Hats and Heavy Duty Angles are manufactured from G2 Z275 & Z450 Galvanised Steel
- Heavy Duty Angles are available in 0.75 and 1.15bmt steel thicknesses

#### **SUITABLE FOR**

##### **Top Hats**

- Internal and external applications
- Higher wind loading areas or with heavy duty sheeting
- Vertical fascias and soffits

##### **Heavy Duty Steel Angles**

- Autoclaved Aerated Concrete Panel Systems (AAC) and steel framing requirements for façade systems

##### **Speedpanel Channel & Angle**

- 78mm Speedpanel systems

## MATERIAL SAFETY DATA INFORMATION

### MATERIALS

Products manufactured by Rondo Building Services are produced from coated steel coil material which is classified as a non-hazardous material.

### PRODUCTION PROCESSES

A water-based soluble lubricant is used to assist with the roll forming process. These soluble lubricants are not considered hazardous when used as recommended by the manufacturer.

### HANDLING AND STORAGE

Products are supplied in pack and sub-pack quantities and should be handled in accordance with the recommendations contained in AS 1470 – Health and Safety at Work Principles and Practice.

Where mechanical lifting or moving equipment is required, trained, and licensed operators are to be used.

Metal products should be stored in an environmentally friendly area away from airborne contaminants such as acid and salt sprays.

### SAFETY

It is our recommendation that PPE should be worn when handling metal products (AS 2161 –Occupational Protective Gloves) and that they should be checked regularly for damage.

People with sensitive skin conditions should seek medical advice before prolonged handling of metal products: hands should be washed before eating and for personal hygiene.

Safety glasses (AS/NZS 1336) should be worn when cutting metal sections.

### SITE TRAINING

It is the responsibility of the contractor to ensure their employees are trained in onsite WHS procedures as these can vary from site to site.

### COMBUSTIBILITY

For more information on the steel used by Rondo visit [www.steel.com.au](http://www.steel.com.au) or [click here](#).

## RONDO WARRANTY

Rondo's quality products are backed by our comprehensive warranty.

With minimal exclusions, our warranty provides optimal peace of mind.
